

# JD Edwards EnterpriseOne One View Project Costing

## ORACLE®

### JD EDWARDS ENTERPRISEONE

#### KEY FEATURES AND BENEFITS

- Empower end users to design, create, run, and share reports to meet business needs
- Intuitive and powerful process that does not require complex skills
- Reduce the backlog of user requested reports with IT
- Enhanced real-time decision making through the use of interactive reports with lists, charts, graphs, and tables
- Intuitive, user-friendly reports designed to improve business productivity
- Easy access to any level of detail required to make informed business decision using drill-down capabilities
- Real-time access to critical operational data
- Visibility into business information directly from JD Edwards applications
- Single reporting solution for all JD Edwards modules and custom applications
- Embedded administration and management of reports

Access to real-time data in an easy-to-consume format is no longer a luxury for employees; it is a necessity and an essential part of achieving operational excellence. One View Reporting enables users to access and personalize transaction data into lists, charts, graphs, and tables, thus simplifying the consumption of information. Casual and power users alike will appreciate the simple yet robust, integrated reporting capabilities as part of the interaction with all JD Edwards applications.

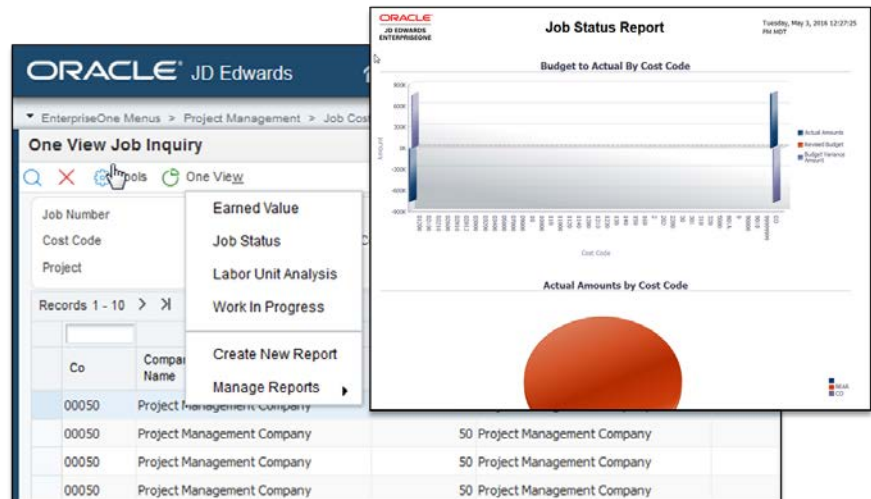

Figure 1. One View Project Costing

The JD Edwards EnterpriseOne reporting capabilities are designed to deliver personalized access to information critical to your business processes. One View Reporting is all about delivering the right data to the right person, right now. Clear and concise views over operational activities lead to more effective decision making and improved productivity. One View Reporting's intuitive interface empowers end users with the flexibility to create personalized transactional reports without the need for IT assistance.

## One View Reporting Project Costing Module

With One View Project Costing, improve insight across your project portfolio to ensure projects remain on time and on budget. Users have the choice and flexibility of reporting on their projects to match both the financial and project reporting requirements of their

organization. Financial categories and other financial information as well as project categories and other project information provide users multiple ways to view their projects for reporting and project comparison purposes. Project managers can accurately assess the health of their business with a view of a single project's status or many projects together at any point in time. This status includes budgets, actuals, open commitments, and other financial amounts with consolidated month-to-date, year-to-date, and job-to-date information for ease of reporting.

One View Project Costing delivers a set of high-value reports to help keep your projects on track. Reports include consolidated and detailed labor unit metrics that provide productivity analysis across your project portfolio. Improve bottom-line performance on projects through detailed and summarized WIP reports. With the WIP report, project managers quickly and accurately assess the profitability of their projects. Project managers can help keep projects on track through earned value metrics.

## JD Edwards EnterpriseOne One View Reporting

JD Edwards EnterpriseOne One View Reporting enables end users to access data from simple to sophisticated reports using JD Edwards EnterpriseOne find browse applications with Oracle BI Publisher layout reporting and distribution features. One View Applications combine essential transaction data and master data, including associated descriptions and category codes, previously not available. Users can view data in the exact layout they want using all the advanced capabilities of Oracle BI Publisher. One View Reporting provides a large library of predefined reports designed to answer the most common business questions. Delivered reports can be personalized by end users as needed and additional reports can be defined without IT support. The complexity of data models, table joins, and business views are masked from the end user to ensure intuitive reporting experiences. One View Reporting provides users a simplified and clear view of the essential data necessary to effectively execute business processes.
